Subject index*

A

Absorption of oleic acid by guinea pig gallbladder, 985

Acceleration and peak aortic flow as indices of ventricular performance in dog, 307

Acid-citrate-dextrose and citrate-phosphate-dextrose with adenine and inosine. Hemoglobin function in stored blood. IV. Red cell adenosine triphosphate and 2,3-diphosphoglycerate in, 46

Implications regarding delivery of oxygen, 2,3-diphosphoglycerate in red cells stored in, 430

Actinomycin D administration, protein- and hemoglobin-synthesizing ability of subcellular fractions isolated from erythroid cell cohorts synchronized by, 916

-treated animals, ribonucleic acid production and breakdown in synchronized erythroid cohorts from, 923

Activation analysis, neutron, tissue copper, zinc, and manganese levels in Wilson's disease: Studies with use of, 438

Activators and inhibitors of proteases in purulent sputum, 713

Acyltransferase, lecithin-cholesterol, and to serum lipids, red cell lipids in liver disease: Relationship to, 891

Adenine dinucleotide-linked, reduced nicotinamide, analysis of 2,3-diphosphoglyceric acid: Spectrophotometric and fluorometric procedures, 470

and inosine, hemoglobin function in stored blood. IV. Red cell adenosine triphosphate and 2,3-diphosphoglycerate in acid-citrate-dextrose and citrate-phosphate-dextrose with, 46

phosphoribosyltransferase enzyme in human fibroblasts lacking hypoxanthine-guanine phosphoribosyltransferase, studies on, 33

Adenosine-3′,5′-monophosphate, cyclic, on bone marrow Δ-aminolevulinic acid synthetase and erythrocyte iron uptake, effect of, 793

in neuroblastoma, synthesis and excretion of, 445

Adenosine—Cont'd

phosphorylation in platelets by dipyridamole, inhibition of, 88

triphosphatase activity, alveolar macrophage membrane, effects of divalent metal ions on, 563

triphosphate and 2,3-diphosphoglycerate, red cell, in acid-citrate-dextrose and citrate-phosphate-dextrose with adenine and inosine. Hemoglobin function in stored blood. IV, 46

Adipose tissue cells: Influence of donor factors, lipolysis of, 254

Adrenal catecholamine-synthesizing enzymes after postmortem treatment in rats and after necropsy in human beings, levels of, 290

Adrenocorticotropic hormone, plasma, new phenomenon of usefulness in radioimmunoassay of, 490

Aggregating agents and platelet antibody, studies on lipid peroxides in platelets. II. Effect of, 728

Alcohol but not by carbohydrate, alcoholic hyperlipidemia: Induction by, 384

Aldosterone deficiency and renal bicarbonate reabsorption, 931

Alkaline proteinases, *Bacillus subtilis*, to α_2-macroglobulin, binding of, 951

Allergic and normal serum by radioimmunoassay, measurement of IgE in, 690

Allograft rejection, vascular renal, by leukocyte sensitization, induction of, 396

Alpha chain, stable, human hemoglobin: Preparation of, 594

-methylglucoside by normal and diabetic human jejunal mucosa, uptake of, 743

-1 antitrypsin, human serum, bacterial inactivation of, 777

Alveolar macrophage membrane adenosine triphosphatase activity, effects of divalent metal ions on, 563

Amino acid(s) and dopa levels in plasma and urine from L-dopa-treated patients with Parkinson's disease, 319

nitrogen by dietary means in obese and normal human subjects, alteration in urinary excretion rate of, 278

*January, pp. 1-176; February, pp. 177-356; March, pp. 357-528; April, pp. 529-704; May, pp. 705-890; June, pp. 891-1070.

Δ-Aminolevulinic acid synthetase, bone marrow, and erythrocyte iron uptake, effect of cyclic adenosine-3′,5′-monophosphate on, 793
Aminonucleoside nephrosis, rat glomerular basement membrane composition and metabolism in, 97
α-Amylase, crude, from *Bacillus subtilis* on cartilage glycosaminoglycans, action of, 7
Anemia, microangiopathic, and thrombocytopenia (Kasabach-Merritt syndrome): Animal model, hemangioma with, 941
pernicious, or leukemia, leukocyte ribonucleotide reductase: Studies in normal subjects and in subjects with, 59
Anhydrases, human carbonic. V. Levels in erythrocytes in various states, 39
Antibacterial effect of normal and infected urinary bladder, 605
Antibiotic synergism against enterococci. I. Bacteriologic studies, studies on, 821
Antibody(ies), human, to ruminant IgM concealing absence of IgA in man, 629
platelet, and aggregating agents, studies on lipid peroxides in platelets. II. Effect of, 728
precipitating, definition of cow's milk protein fraction evoking, 529
responses, heightened circulating, in New Zealand mice, 558
test, automated fluorescent treponemal, for syphilis, evaluation of, 885
(Antihemophilic factor), factor VIII, employing snake venom, simple method for purification of, 153
human factor VIII: Activation and inactivation by phospholipases, 206
isolation and some chemical properties of, 185
Antihistamine activity, natural, in urine and blood of man, estimation of, 786
Antisera, commercial precipitating, against human IgA, comparative evaluation of, 639
and intestinal fluids, in immunodiffusion studies: Explanation for their occurrence and how they can be avoided, nonimmunoglobulin precipitin lines between, 326
Antitrypsin deficiency, measurement of elastase activity by elastin agar and its use in detection of, 510
human serum alpha-1, bacterial inactivation of, 777
Anuria, dextran-40-induced, pathopysiology and prevention of, 76
Aortic flow, peak, and acceleration as indices of ventricular performance in dog, 307
Arthritis, rheumatoid. II. Defective regulation of hyaluronate and collagen formation, abnormalities of connective tissue cells cultured from patients with, 65
Arylamines in urine without interference of indican, determination of, 524
AutoAnalyzer, automated platelet counting with, 656
Autoantibodies to intrinsic factor: Their determination and clinical usefulness, 476
8-Azaguanine-resistant growth of cultured fibroblasts, detection of females heterozygous for Lesch-Nyhan mutation by, 596

B

Bacillus subtilis alkaline proteinases to α_2-macroglobulin, binding of, 951
on cartilage glycosaminoglycans, action of crude α-amylase from, 7
Bicarbonate reabsorption, renal, and aldosterone deficiency, 931
Bile and gallstone, calculus versus milieu, 366
salts on lecithin synthesis, effect of, 122
Binding of *Bacillus subtilis* alkaline proteinases to α_2-macroglobulin, 951
Biogenesis of erythropoietin: Role of substrate for erythrogenin, 751
Biopsy, bone marrow, with unaltered architecture: New biopsy device, 335
device, new, bone marrow biopsy with unaltered architecture, 335
Bone marrow biopsy with unaltered architecture: New biopsy device, 335
Δ-aminolevulinic acid synthetase and erythrocyte iron uptake, effect of cyclic adenosine-3′,5′-monophosphate on, 793
Bladder, normal and infected urinary, antibacterial effect of, 605
Blood, human, simplified method for measurement of chemotaxis of polymorphonuclear lymphocytes from, 501
pH, fetal scalp, unreliability of single estimation of, 535
stored. IV. Red cell adenosine triphosphate and 2,3-diphosphoglycerate in acid-citrate-dextrose and citrate-phosphate-dextrose with adenine and inosine, hemoglobin function in, 46
Burns, measurement of edema following, 451

C

C1 esterase, radioimmunoassay for, 645
Calcium excretion, increased, after saline administration to hypertensive subjects, 298
Calculus versus milieu: Gallstone and bile, 366
Cancer, cure of, 1976, 357
Carbohydrate, alcoholic hyperlipidemia: Induction by alcohol but not by, 384
Carbonic anhydrases, human. V. Levels in erythrocytes in various states, 39
Carbon monoxide production, endogenous, measured by gas-phase analysis: Estimation of heme catabolic rate, 867
Carboxyhemoglobin. Clinical and in vitro studies in man, cytologic demonstration of, 543

L-Carnitine in experimental intoxication with diphtheria toxin, protective effect of, 616
Carrier protein in salicylanilide sensitivity: Migration-inhibition test in contact photoallergy, requirement for, 572
Cartilage glycosaminoglycans, action of crude α-amylase from *Bacillus subtilis* on, 71
Catabolic rate, heme, endogenous carbon monoxide production measured by gas-phase analysis: Estimation of, 867
Catecholamine-synthesizing enzymes, adrenal, after postmortem treatment in rats and after necropsy in human beings, levels of, 290
Cell(s), connective tissue, cultured from patients with rheumatoid arthritis. II. Defective regulation of hyaluronate and collagen formation, abnormalities of, 65
germ, of dogs by progesterone chromosome alterations produced in, 417
hematopoietic stem, factors regulating proliferation and migration of, 239
human adipose tissue: Influence of donor factors, lipolysis of, 254
red, adenosine triphosphate and 2,3-diphosphoglycerate in acid-citrate-dextrose and citrate-phosphate-dextrose with adenine and inosine. Hemoglobin function in stored blood. IV, 46
stored in acid-citrate-phosphate and citrate-phosphate-dextrose: Implications regarding delivery of oxygen, 2,3-diphosphoglycerate in, 430
Cellularity of endocolonized spleen, studies of recovery of erythropoiesis after irradiation as function of, 219
Chemotaxis of polymorphonuclear lymphocytes from human blood, simplified method for measurement of, 501
Chloramphenicol therapy, survival of glucose-6-phosphate dehydrogenase-deficient erythrocytes in patients with typhoid fever on, 177
Cholecystokinin-pancreozymin, porcine, radioimmunoassay of, 684
Chromatography, double column, measurement of serum triiodothyronine by, 1039
Chromosome alterations produced in germ cells of dogs by progesterone, 417
Cineangiography, single-plane, and indicator dilution, comparison of left ventricular volumes by, 580
Circulating antibody responses, heightened, in New Zealand mice, 558
Citrate-phosphate-dextrose and acid-citrate-dextrose with adenine and inosine, hemoglobin function in stored blood. IV. Red cell adenosine triphosphate and 2,3-diphosphoglycerate in, 46
Implications regarding delivery of oxygen, 2,3-diphosphoglycerate in red cells stored in, 430
Clindamycin and five other lincomycin analogs against strains of *Haemophilus influenzae*, in vitro study of, 378
Clotting-factor concentrate, new (Konyne), therapeutic approaches to factor X deficiency with emphasis on use of, 23
Coagulation, endotoxin-induced intravascular: Prevention with polymixin B sulfate, 802
intravascular. Serial dilution protamine sulfate test for detection of fibrin monomer and fibrin degradation products, laboratory identification of, 665
Cohorts, erythroid cell, synchronized by actinomycin D administration, protein- and hemoglobin-synthesizing ability of subcellular fractions isolated from, 916
synchronized erythroid, from actinomycin-treated animals, ribonucleic acid production and breakdown in, 923
Collagen formation and hyaluronate, abnormalities of connective tissue cells cultured from patients with rheumatoid arthritis. II. Defective regulation of, 65
Commercial precipitating antisera against human IgA, comparative evaluation of, 639
Complement fixation and gel diffusion, counterelectrophoresis for detection of hepatitis-associated antigen: Methodology and comparison with, 1000
Connective tissue cells cultured from patients with rheumatoid arthritis. II. Defective regulation of hyaluronate and collagen formation, abnormalities of, 65
Contact photoallergy, requirement for carrier protein in salicylanilide sensitivity: Migration-inhibition test in, 572
Contraceptives, oral, on factor VIII levels, effect of, 551
Copper, zinc, and manganese levels, tissue, in Wilson's disease: Studies with use of neutron activation analysis, 438
Counterelectrophoresis for detection of hepatitis-associated antigen: Methodology and comparison with gel diffusion and complement fixation, 1000
Creatine phosphokinase in normal neonates and young infants, 853
Cyclic adenosine-3′,5′monophosphate on bone marrow Δ-aminolevulinic acid synthetase and erythrocyte iron uptake, 793
in neuroblastoma, synthesis and excretion of, 445
Cytologic demonstration of carboxyhemoglobin. Clinical and in vitro studies in man, 543

D

Dehydrocholate, sodium, by rat liver: Its effect on micelle formation in bile, metabolism of, 811
Dehydrogenase-deficient, glucose-6-phosphate, erythrocytes in patients with typhoid on chloramphenicol therapy, survival of, 177
malic, human erythrocyte. Utilization of L-malate by human erythrocytes, purification and properties of, 459
Deoxyribonucleic acid and ribonucleic acid content of tissues, and zinc-dependent enzymes, Biochemical effects of zinc deficiency, 144
Dextran-40-induced anuria, pathophysiology and prevention of, 76
Diaphorase bands of human erythrocytes, 859
Diffusion, gel, and complement fixation, counterelectrophoresis for detection of hepatitis-associated antigen: Methodology and comparison with, 1000
Dinucleotide-linked, reduced nicotinamide adenine, analysis of 2,3-diphosphoglyceric acid: Spectrophotometric and fluorometric procedures, 470
2,3-Diphosphoglycerate and adenosine triphosphate, red cell, in acid-citrate-dextrose and citrate-phosphate-dextrose with adenine and inosine. Hemoglobin function in stored blood. IV, 46
in red cells stored in acid-citrate-dextrose and citrate-phosphate-dextrose: Implications regarding delivery of oxygen, 430
2,3-Diphosphoglyceric acid: Spectrophotometric and fluorometric procedures, reduced nicotinamide adenine dinucleotide-linked analysis of, 470
Diphtheria toxin, protective effect of L-carnitine in experimental intoxication with, 616
Dipyridamole, inhibition of adenosine phosphorylation in platelets by, 88
Divalent metal ions on alveolar macrophage membrane adenosine triphosphatase activity, effects of, 563
Dopa and amino acid levels in plasma and urine from L-dopa-treated patients with Parkinson's disease, 319
-treated patients with Parkinson's disease, amino acid and dopa levels in plasma and urine from, 319
Dose interpolation, radioimmunoassay: Simplified procedure for, 661
Drug-metabolizing enzymes and hepatic ethanol, and on rates of ethanol degradation, effect of ethanol administration on, 110

E

Edema following burns, measurement of, 451
Elastase activity by elastin agar and its use in detection of antitrypsin deficiency, measurement of, 510
Elastin agar and its use in detection of antitrypsin deficiency, measurement of elastase activity by, 510
Electrochromatography, segmental. New method for protein separation, 517
Endocolonized spleen, studies of recovery of erythropoiesis after irradiation as function of cellularity of, 219
Endotoxin-induced intravascular coagulation: Prevention with polymixin B sulfate, 802
Enterococci. I. Bacteriologic studies, studies on antibiotic synergism against, 821
Enzymes, adrenal catecholamine-synthesizing, after postmortem treatment in rats and after necropsy in human beings, levels of, 290
Erythrocyte(s), glucose-6-phosphate dehydrogenase-deficient, in patients with typhoid on chloramphenicol therapy, survival of, 177
human, diaphorase bands of, 859
malic dehydrogenase. Utilization of L-malate by human erythrocytes, purification and properties of, 459
iron uptake and bone marrow Δ-aminolevulinic acid synthetase, effect of cyclic adenosine-3′,5′-monophosphate on, 793
in various states. Human carbonic anhydrases. V. Levels in, 39
Erythrogenin, biogenesis of erythropoietin: Role of substrate for, 751
Erythroid cell cohorts synchronized by actinomycin D administration, protein- and hemoglobin-synthesizing ability of subcellular fractions isolated from, 916
cohorts, synchronized, from actinomycin-treated animals, ribonucleic acid production and breakdown in, 923
Erythropoiesis after irradiation as function of cellularity of endocolonized spleen, studies of recovery of, 219
Erythropoietin in polycythemic mice. II. Response in mice with polycythemia induced by hypoxia or transfusion, mode of action of, 134
role of substrate for erythrogenin, biogenesis of, 751
Esterase, C1, radioimmunoassay for, 645
Ethanol administration on hepatic ethanol and drug-metabolizing enzymes and on rates of ethanol degradation, effect of, 110
hepatic, and drug-metabolizing enzymes and on rates of ethanol degradation, effect of ethanol administration on, 110
Ethylene oxide toxicity. Study of tissue reactions to retained ethylene oxide, 346
Excretion rate, urinary, of amino acids and nitrogen by dietary means in obese and normal human subjects, alteration in, 278

Extracellular fluid volume with ^{169}Yb-diethylenetriaminepentaacetate, measurement of, 699

F

Factor V assay to compensate, change in Russell's viper venom (Stypven): Modification of, 343
Factor VIII (antihemophilic factor) employing snake venom, simple method for purification of, 153
human (antihemophilic factor): Activation and inactivation by phospholipases, 206
isolation and some chemical properties of, 185
levels, effect of oral contraceptives on, 551
Factor X deficiency with emphasis on use of new clotting-factor concentrate, therapeutic approaches to, 23
Ferritin synthesis, duodenal, in iron-replete and iron-deficient rats: Response to small doses of iron, 54
Fetal scalp blood pH, unreliability of single estimation of, 535
Fibrin degradation products and fibrin monomer, laboratory identification of intravascular coagulation. Serial dilution protamine sulfate test for, 665
split products, urinary, in human renal disease, 843
Fibrinogen, platelet, quantitative determination of, 485
Fibrinolytic split products: Comparison of staphylococcal clumping and hemagglutination-inhibition tests, assay for, 993
Fibroblasts, cultured, detection of females heterozygous for Lesch-Nyhan mutation by 8-azaguanine-resistant growth of, 596
human, lacking hypoxanthine-guanine phosphoribosyltransferase, studies on adenine phosphoribosyltransferase enzyme in, 33
Flow, peak aortic, and acceleration as indices of ventricular performance in dog, 307
Fluid volume, extracellular, with ^{169}Yb-diethylenetriaminepentaacetate, measurement of, 699
Fluorescent treponemal antibody test, automated, for syphilis, evaluation of, 885
Fluorometric and spectrophotometric procedures, reduced nicotinamide adenine dinucleotide-linked analysis of 2,3-diphosphoglyceric acid, 470
Furosemide upon unilateral experimentally diseased dog kidney, altered effect of, 14

G

Gallstone and bile, calculus versus milieu, 366
Gas chromatography, rapid identification and quantitation of urinary metabolites of phenylalanine in phenylketonuria by, 159
-phase analysis: Estimation of heme catabolic rate, endogenous carbon monoxide production measured by, 867
Gastric juice: Study of fifty cases, proteins in, 228
Germ cells of dogs by progesterone, chromosome alterations produced in, 417
Glomerular basement membrane composition and metabolism, rat, in aminonucleoside nephrosis, 97
Glucose-6-phosphate dehydrogenase-deficient erythrocytes in patients with typhoid on chlorampenicol therapy, survival of, 177
Glucuronidation. III. Measurement of *p*-nitrophenyl glucuronide, studies of, 1015
Glycosaminoglycans, cartilage, action of crude *α*-amylase from *Bacillus subtilis* on, 7
Guanine, hypoxanthine- , phosphoribosyltransferase, studies on adenine phosphoribosyltransferase enzyme in human fibroblasts lacking, 33

H

Haemophilus influenzae, in vitro study of clindamycin and five other lincomycin analogs against strains of, 378
Hemagglutination-inhibition tests and staphylococcal clumping, assay for fibrinolytic split products: Comparison of, 993
Hemangioma with thrombocytopenia and microangiopathic anemia (Kasabach-Merritt syndrome): Animal model, 941
Hematopoietic stem cells, factors regulating proliferation and migration of, 239
Heme catabolic rate, endogenous carbon monoxide production measured by gas-phase analysis: Estimation of, 867
Hemoglobin function in stored blood. IV. Red cell adenosine triphosphate and 2,3-diphosphoglycerate in acid-citrate-dextrose and citrate-phosphate-dextrose with adenine and inosine, 46
human plasma, by difference spectrophotometry, measurement of, 168
preparation of stable alpha chain, 594
and protein-synthesizing ability of subcellular fractions isolated from erythroid cell cohorts synchronized by actinomycin D administration, 916
Heparin therapy, comparison of activated recalcification and partial thromboplastin tests as controls of, 901
Hepatic ethanol and drug-metabolizing enzymes and on rates of ethanol degradation, effect of ethanol administration on, 110

Hepatitis-associated antigen: Methodology and comparison with gel diffusion and complement fixation counterelectrophoresis for detection of, 1000
Hexose monophosphate shunt activity of circulating phagocytes in acute lymphocytic leukemia, 975
Hyaluronate and collagen formation, abnormalities of connective tissue cells cultured from patients with rheumatoid arthritis. II. Defective regulation of, 65
25-Hydroxycholecalciferol and vitamin D_3 in rat, placental transfer of, 908
Hyperlipidemia, alcoholic: Induction by alcohol but not by carbohydrate, 384
Hypertensive subjects, increased calcium excretion after saline administration to, 298
Hypoxanthine-guanine phosphoribosyltransferase, studies on adenine phosphoribosyltransferase enzyme in human fibroblasts lacking, 33
Hypoxia or transfusion, mode of action of erythropoietin in polycythemic mice. II. Response in mice with polycythemia induced by, 134

I

IgA, human, comparative evaluation of commercial precipitating antisera against, 639
in man, human antibodies to ruminant IgM concealing absence of, 629
IgE in normal and allergic serum by radioimmunoassay, measurement of, 690
IgM, ruminant, concealing absence of IgA in man, human antibodies to, 629
Immunoassay, specific, for quantitative determination of human trypsin in intestinal content, 877
Immunodiffusion studies: Explanation for their occurrence and how they can be avoided, nonimmunoglobulin precipitin lines between intestinal fluids and antisera in, 326
Indican, determination of arylamines in urine without interference of, 524
Indicator dilution and single-plane cineangiography, comparison of left ventricular volumes by, 580
Infusion, continuous long-term intravenous, in unrestrained mice—method, 1011
Inhibitors and activators of leukocytic proteases in purulent sputum, 713
Inosine and adenine, hemoglobin function in stored blood. IV. Red cell adenosine triphosphate and 2,3-diphosphoglycerate in acid-citrate-dextrose and citrate-phosphate-dextrose with, 46
Insulin-^{125}I removal rate, plasma, effect of nephrectomy and acute uremia on, 829
Interferon response in lymphocytes from patients with uremia, suppression of, 768
Interpolation, dose, radioimmunoassay: Simplified procedure for, 661
Intoxication, experimental, with diphtheria toxin, protective effect of L-carnitine in, 616
Intravascular coagulation, endotoxin-induced: Prevention with polymixin B sulfate, 802
Serial dilution protamine sulfate test for detection of fibrin monomer and fibrin degradation products, laboratory identification of, 665
Intrinsic factor. Their determination and clinical usefulness, autoantibodies to, 476
Iron-deficient and iron-replete rats: Response to small doses of iron, duodenal ferritin synthesis in, 54
duodenal ferritin synthesis in iron-replete and iron-deficient rats: Response to small doses of, 54
-replete and iron-deficient rats: Response to small doses of iron, duodenal ferritin synthesis in, 54
uptake, erythrocyte, and bone marrow Δ-aminolevulinic acid synthetase, effect of cyclic adenosine-3′,5′-monophosphate on, 793
Irradiation as a function of cellularity of endocolonized spleen, studies of recovery of erythropoiesis after, 219

J

Jejunal mucosa, normal and diabetic human, uptake of alpha-methylglucoside by, 743
sucrase activity in diabetic rats, 838

K

(Kasabach-Merritt syndrome): Animal model, hemangioma with thrombocytopenia and microangiopathic anemia, 941
(Konyne), new clotting-factor concentrate, therapeutic approaches to factor X deficiency with emphasis on use of, 23

L

Lead in rat, subcellular distribution of, 705
Lecithin-cholesterol acyltransferase and to serum lipids, red cell lipids in liver disease: Relationship to, 891
synthesis, effect of bile salts on, 122
Lesch-Nyhan mutation by 8-azaguanine-resistant growth of cultured fibroblasts, detection of females heterozygous for, 596
Letter from Editors, 1
Leukemia, acute lymphocytic, hexose monophosphate shunt activity of circulating phagocytes in, 975
or pernicious anemia, leukocyte ribonucleotide reductase: Studies in normal subjects and in subjects with, 59

Leukocyte ribonucleotide reductase: Studies in normal subjects and in subjects with leukemia or pernicious anemia, 59
sensitization, induction of vascular renal allograft rejection by, 396
Lincomycin analogs, five other, against strains of *Haemophilus influenzae*, in vitro study of clindamycin and, 378
Lipid(s) peroxides in platelets. II. Effect of aggregating agents and platelet antibody, studies on, 728
red cell, in liver disease: Relationship to serum lipids and to lecithin-cholesterol acyltransferase, 891
serum and to lecithin-cholesterol acyltransferase, red cell lipids in liver disease: Relationship to, 891
Lipolysis of human adipose tissue cells: Influence of donor factors, 254
Lymphocytes from patients with uremia, suppression of interferon response in, 768
polymorphonuclear, from human blood, simplified method for measurement of chemotaxis of, 501
xeroderma pigmentosum, ultraviolet-stimulated thymidine incorporation in, 759
Lymphocytic leukemia, acute, hexose monophosphate shunt activity of circulating phagocytes in, 975

M

α_2-Macroglobulin, binding of *Bacillus subtilis* alkaline proteinases to, 951
Macrophage membrane, alveolar, adenosine triphosphatase activity, effects of divalent metal ions on, 563
L-Malate by human erythrocytes, purification and properties of human erythrocyte malic dehydrogenase. Utilization of, 459
Malic dehydrogenase, human erythrocyte. Utilization of L-malate by human erythrocytes, purification and properties of, 459
Manganese, copper, and zinc levels, tissue, in Wilson's disease: Studies with use of neutron activation analysis, 438
Metabolites, urinary, of phenylalanine in phenylketonuria by gas chromatography, rapid identification and quantitation of, 159
Metal ions, divalent, on alveolar macrophage membrane adenosine triphosphatase activity, effects of, 563
3-Methoxy-4-hydroxyphenylglycol in urine, spectrophotometric method for estimation of, 677
Methylguanidine in chronic renal failure, serum levels and urinary excretion of, 1020
Micelle formation in bile, metabolism of sodium dehydrocholate by rat liver: Its effect on, 811
Microangiopathic anemia and thrombocytopenia (Kasabach-Merritt syndrome): Animal model, hemangioma with, 941
Migration-inhibition test in contact photoallergy, requirement for carrier protein in salicylanilide sensitivity, 572
Milk protein fraction, cow's, evoking precipitating antibodies, definition of, 529
Monomer, fibrin, and fibrin degradation products, laboratory identification of intravascular coagulation. Serial dilution protamine sulfate test for, 665
Monophosphate shunt activity, hexose, of circulating phagocytes in acute lymphocytic leukemia, 975
Mucosa, normal and diabetic human jejunal, uptake of alpha-methylglucoside by, 743

N

Nephrectomy and acute uremia on plasma insulin-^{125}I removal rate, effect of, 829
Nephrosis, aminonucleoside, rat glomerular basement membrane composition and metabolism in, 97
Neuroblastoma, synthesis and excretion of cyclic adenosine monophosphate in, 445
Neutron activation analysis, tissue copper, zinc, and manganese levels in Wilson's disease: Studies with use of, 438
Nicotinamide adenine dinucleotide-linked, reduced, analysis of 2,3-diphosphoglyceric acid: Spectrophotometric and fluorometric procedures, 470
Nitrogen and amino acids by dietary means in obese and normal human subjects, alteration in urinary excretion rate of, 278
p-Nitrophenyl glucuronide, studies of glucuronidation. III. Measurement of, 1015
Nonimmunoglobulin precipitin lines between intestinal fluids and antisera in immunodiffusion studies: Explanation for their occurrence and how they can be avoided, 326
Norepinephrine, plasma, concentration and renin activity in salt-depleted man, effect of prednisone on, 267

O

Oleic acid by guinea pig gallbladder, absorption of, 985
Oral contraceptives on factor VIII levels, effect of, 551
Oxide, ethylene, toxicity. Study of tissue reactions to retained ethylene oxide, 346
Oxygen, 2,3-diphosphoglycerate in red cells stored in acid-citrate-dextrose and citrate-phosphate-dextrose: Implications regarding delivery of, 430

XUM

P

Parkinson's disease, amino acid and dopa levels in plasma and urine from L-dopa-treated patients with, 319
Peroxides, lipid, in platelets. II. Effect of aggregating agents and platelet antibody, studies on, 728
pH, fetal scalp blood, unreliability of single estimation of, 535
Phagocytes, circulating, in acute lymphocytic leukemia, hexose monophosphate shunt activity of, 975
Phenylalanine in phenylketonuria by gas chromatography, rapid identification and quantitation of urinary metabolites of, 159
Phenylketonuria by gas chromatography, rapid identification and quantitation of urinary metabolites of phenylalanine in, 159
Phosphate, glucose-6- , dehydrogenase-deficient erythrocytes in patients with typhoid on chloramphenicol therapy, survival of, 177
Phosphokinase, creatine, in normal neonates and young infants, 853
Phospholipases, human factor VIII (antihemophilic factor): Activation and inactivation by, 206
Phosphoribosyltransferase enzyme, adenine, in human fibroblasts lacking hypoxanthine-guanine phosphoribosyltransferase, studies on, 33
hypoxanthine-guanine, studies on adenine phosphoribosyltransferase enzyme in human fibroblasts lacking, 33
Phosphorylation, adenosine, in platelets by dipyridamole, inhibition of, 88
Photoallergy, contact, requirement for carrier protein in salicylanilide sensitivity: Migration-inhibition test in, 572
Plasma adrenocorticotropic hormone, new phenomenon of usefulness in radioimmunoassay of, 490
hemoglobin, human, by difference spectrophotometry, measurement of, 168
insulin-^{125}I removal rate, effect of nephrectomy and acute uremia on, 829
norepinephrine concentration and renin activity in salt-depleted man, effect of prednisone on, 267
renin activity by radioimmunoassay, accurate and rapid measurement of, 1025
and urine from L-dopa-treated patients with Parkinson's disease, amino acid and dopa levels in, 319
Platelet(s). II. Effect of aggregating agents and platelet antibody, studies on lipid peroxides in, 728
antibody and aggregating agents, studies on lipid peroxides in platelets. II. Effect of, 728
counting, automated, with AutoAnalyzer, 656
by dipyridamole, inhibition of adenosine phosphorylation in, 88
fibrinogen, quantitative determination of, 485
Platelet(s)—Cont'd
function, effect of pyrimido-pyrimidine compounds on, 958
Polycythemia induced by hypoxia or transfusion, mode of action of erythropoietin in polycythemic mice. II. Response in mice with, 134
Polycythemic mice. II. Response in mice with polycythemia induced by hypoxia or transfusion, mode of action of erythropoietin in, 134
Polymixin B sulfate, endotoxin-induced intravascular coagulation: Prevention with, 802
Polymorphonuclear lymphocytes from human blood, simplified method for measurement of chemotaxis of, 501
Precipitating antibodies, definition of cow's milk protein fraction evoking, 529
antisera, commercial, against human IgA, comparative evaluation of, 639
Precipitin lines, nonimmunoglobulin, between intestinal fluids and antisera in immunodiffusion studies: Explanation for their occurrence and how they can be avoided, 326
Prednisone on plasma norepinephrine concentration and renin activity in salt-depleted man, effect of, 267
Progesterone, chromosome alterations produced in germ cells of dogs by, 417
Protamine sulfate test, serial dilution, for detection of fibrin monomer and fibrin degradation products, laboratory identification of intravascular coagulation, 665
Proteases in purulent sputum, inhibitors and activators of, 713
Protein(s), carrier, in salicylanilide sensitivity: Migration-inhibition test in contact photoallergy, requirement for, 572
fraction, cow's milk, evoking precipitating antibodies, definition of, 529
in gastric juice: Study of fifty cases, 228
and hemoglobin-synthesizing ability of subcellular fraction isolated from erythroid cell cohorts synchronized by actinomycin D administration, 916
separation, segmental electrochromatography. New method for, 517
Proteinases, *Bacillus subtilis* alkaline, to α_2-macroglobulin, binding of, 951
Pyrimido-pyrimidine compounds on platelet function, effect of, 958

R

Radioimmunoassay, accurate and rapid measurement of plasma renin activity by, 1025
for C1 esterase, 645
measurement of IgE in normal and allergic serum by, 690
of plasma adrenocorticotropic hormone, new phenomenon of usefulness in, 490
of porcine cholecystokinin-pancreozymin, 684

Radioimmunoassay—Cont'd
simplified procedure for dose interpolation, 661
Reabsorption, renal bicarbonate, and aldosterone deficiency, 931
Recalcification, activated, and partial thromboplastin tests as controls of heparin therapy, comparison of, 901
Red cell lipids in liver disease: Relationship to serum lipids and to lecithin-cholesterol acyltransferase, 891
Reductase, leukocyte ribonucleotide: Studies in normal subjects and in subjects with leukemia or pernicious anemia, 59
Rejection, vascular renal allograft, by leukocyte sensitization, induction of, 396
Renal allograft rejection, vascular, by leukocyte sensitization, induction of, 396
disease, human, urinary fibrin split products in, 843
failure, chronic, serum levels and urinary excretion of methylguanidine in, 1020
Renin activity, plasma, by radioimmunoassay, accurate and rapid measurement of, 1025
in salt-depleted man and plasma norepinephrine concentration, effect of prednisone on, 267
Retained ethylene oxide, ethylene oxide toxicity. Study of tissue reactions to, 346
Rheumatoid arthritis. II. Defective regulation of hyaluronate and collagen formation, abnormalities of connective tissue cells cultured from patients with, 65
Ribonucleic acid and deoxyribonucleic acid content of tissues, and zinc-dependent enzymes, Biochemical effects of zinc deficiency, 144
production and breakdown in synchronized erythroid cohorts from actinomycin-treated animals, 923
Ribonucleotide reductase, leukocyte: Studies in normal subjects and in subjects with leukemia or pernicious anemia, 59
Ruminant IgM concealing absence of IgA in man, human antibodies to, 629
Russell's viper venom (Stypven): Modification of factor V assay to compensate, change in, 343

S

Salicylanilide sensitivity: Migration-inhibition test in contact photoallergy, requirement for protein carrier in, 572
Saline administration to hypertensive subjects, increased calcium excretion after, 298
Salts, bile, on lecithin synthesis, effect of, 122
Scalp blood pH, fetal, unreliability of single estimation of, 535
Segmental electrochromatography. New method for protein separation, 517
Sensitization, leukocyte, induction of vascular renal allograft rejection by, 396
Separation, protein, segmental electrochromatography, New method for, 517
Serial dilution protamine sulfate test for detection of fibrin monomer and fibrin degradation products, laboratory identification of intravascular coagulation, 665
Serum alpha-1 antitrypsin, human, bacterial inactivation of, 777
levels and urinary excretion of methylguanidine in chronic renal failure, 1020
lipids and to lecithin-cholesterol acyltransferase, red cell lipids in liver disease: Relationship to, 891
normal and allergic, by radioimmunoassay, measurement of IgE in, 690
triiodothyronine by double column chromatography, measurement of, 1039
Shunt activity, hexose monophosphate, of circulating phagocytes in acute lymphocytic leukemia, 975
Single-plane cineangiography and indicator dilution, comparision of left ventricular volumes by, 580
Sodium dehydrocholate by rat liver: Its effect on micelle formation in bile, metabolism of, 811
Spectrophotometric and fluorometric procedures, reduced nicotinamide adenine dinucleotide-linked analysis of 2,3-diphosphoglyceric acid, 470
method for estimation of 3-methoxy-4-hydroxyphenylglycol in urine, 677
Spectrophotometry, difference, measurement of human plasma hemoglobin by, 168
Spleen, endocolonized, studies of recovery of erythropoiesis after irradiation as function of cellularity of, 219
in thrombokinetics, role of, 247
Split products, urinary fibrin, in human renal disease, 843
Sputum, purulent, inhibitors and activators of proteases in, 713
Staphylococcal clumping and hemagglutination-inhibition tests, assay for fibrinolytic split products: Comparison of, 993
Stem cells, hematopoietic, factors regulating proliferation and migration of, 239
Subcellular distribution of lead in rat, 705
fractions isolated from erythroid cell cohorts synchronized by actinomycin D administration, protein- and hemoglobin-synthesizing ability of, 916
Sucrase activity, jejunal, in diabetic rats, 838
Sulfate, polymixin B, endotoxin-induced intravascular coagulation: Prevention with, 802
test, serial dilution protamine, for detection of fibrin monomer and fibrin degradation products, laboratory identification of intravascular coagulation, 665

Synergism, antibiotic, against enterococci. I. Bacteriologic studies, studies on, 821
Synthetase, bone marrow Δ-aminolevulinic acid, and erythrocyte iron uptake, effect of cyclic adenosine-3′,5′-monophosphate on, 793
Syphilis, evaluation of automated fluorescent treponemal antibody test for, 885

T

T_4 administered during neonatal period, delayed vaginal opening in rat following pharmacologic doses of, 410
Thrombocytopenia and microangiopathic anemia (Kasabach-Merritt syndrome): Animal model, hemangioma with, 941
Thrombokinetics, role of spleen in, 247
Thromboplastin, partial, and activated recalcification tests as controls of heparin therapy, comparison of, 901
Thymidine incorporation, ultraviolet-stimulated, in xeroderma pigmentosum lymphocytes, 759
Toxicity, ethylene oxide. Study of tissue reactions to retained ethylene oxide, 346
Toxin, diphtheria, protective effect of L-carnitine in experimental intoxication with, 616
Transfer, placental, of vitamin D_3 and 25-hydroxycholecalciferol in rat, 908
Treponemal antibody test, automated fluorescent, for syphilis, evaluation of, 885
Triiodothyronine, serum, by double column chromatography, measurement of, 1039
Trypsin, human, in intestinal content, specific immunoassay for quantitative determination of, 877
Typhoid fever on chloramphenicol therapy, survival of glucose-6-phosphate dehydrogenase-deficient erythrocytes in patients with, 177

U

Ultraviolet-stimulated thymidine incorporation in xeroderma pigmentosum lymphocytes, 759
Uremia, acute, and nephrectomy on plasma insulin-^{125}I removal rate, effect of, 829
  suppression of interferon response in lymphocytes from patients with, 768
Urinary bladder, normal and infected, antibacterial effect of, 605
  excretion rate of amino acids and nitrogen by dietary means in obese and normal human subjects, alteration in, 278
    and serum levels of methylguanidine in chronic renal failure, 1020
  metabolites of phenylalanine in phenylketonuria by gas chromatography, rapid identification and quantitation of, 159
Urine without interference of indican, determination of arylamines in, 524
  and plasma from L-dopa-treated patients with Parkinson's disease, amino acid and dopa levels in, 319
  spectrophotometric method for estimation of 3-methoxy-4-hydroxyphenylglycol in, 677

V

Vaginal opening, delayed, in rat, following pharmacologic doses of T_4 administered during neonatal period, 410
Vascular renal allograft rejection by leukocyte sensitization, induction of, 396
Venom, Russell's viper (Stypven): Modification of factor V assay to compensate, change in, 343
  snake, simple method for purification of factor VIII (antihemophilic factor) employing, 153
Ventricular performance in dog, peak aortic flow and acceleration as indices of, 307
  volumes, left, by single-plane cineangiography and indicator dilution, comparison of, 580
Vitamin D_3 and 25-hydroxycholecalciferol in rat, placental transfer of, 908
Volumes, left ventricular, by single-plane cineangiography and indicator dilution, comparison of, 580

W

Wilson's disease: Studies with use of neutron activation analysis, tissue copper, zinc, and manganese levels in, 438

X

Xeroderma pigmentosum lymphocytes, ultraviolet-stimulated thymidine incorporation in, 759

Y

^{169}Yb-diethyltriaminepentaacetate, measurement of extracellular fluid volume with, 699

Z

Zinc deficiency: Changes in activities of zinc-dependent enzymes and ribonucleic acid and deoxyribonucleic acid content of tissues, biochemical effects of, 144
  -dependent enzymes and ribonucleic acid and deoxyribonucleic acid content of tissues, Biochemical effects of zinc deficiency, 144
  manganese, and copper levels, tissue, in Wilson's disease: Studies with use of neutron activation analysis, 438

Achlorhydric patients, impaired absorption of egg vitamin B_{12} in postgastrectomy and, 839 (Abst.)

Acid loss and CO_2 production in proximal and distal segments of human duodenum, 832 (Abst.)

Acid-base alterations and inorganic phosphate (Pi) infusion on red cell 2,3-diphosphoglycerate (DPG) and P_{50} in dogs, effects of acute respiratory, 1010 (Abst.)

Acidosis, and lactic acidemia, metabolic, effects of hypertonic solutions infused intravenously in rabbits, 619

and parathyroid hormone secretion in sheep, metabolic, 819 (Abst.)

Acromegaly, nature of metabolic bone disorder in, 822 (Abst.)

Actin, synthesis and fluorescence polarization analysis of organomercurial derivative of, 808 (Abst.)

Acyltransferase, relationship between serum lipoproteins and red cell membranes in abetalipoproteinemia: deficiency of lecithin:cholesterol, 323

Adenosine monophosphate and gastric secretion, cyclic, 830 (Abst.)

GMP, and related compounds, comparison of human lymphocyte stimulation by cyclic, 856 (Abst.)

triphosphatase (ATPase) activity of kidney mitochondria, sodium-stimulated, 1021 (Abst.)

in human platelets, soluble, magnesium-depleted, calcium-inhibited, 483

triphosphate and 2,3-DPG of stored blood, pyruvate effect in maintenance of, 472

Adenyl cyclase–cyclic AMP (CAMP) system in human lipolysis, further observations on role of, 989 (Abst.)

Adrenal cortex, calcium homeostasis: interrelationship of roles of parathyroid glands and, 812 (Abst.)

Adrenal—Cont'd

disease, ^{131}I-19-iodocholesterol in diagnosis of, 986 (Abst.)

Adrenalectomy and secondary aldosteronism, effects of stilbesterol on renal pressor system as modified by, 30

on renal response to chloride deprivation, effect of, 1017 (Abst.)

Adrenergic effects which modify arginine-induced insulin release in man, 990 (Abst.)

stimulation on ventilation in man, effects of, 800 (Abst.)

Agranulocytosis, biochemical defect in chlorpromazine-sensitive marrow cells, studies on, 435

Alanine administration during prolonged fasting, 992 (Abst.)

Albumin microspheres for studies of coronary circulation, use of technetium-labelled human, 807 (Abst.)

Aldosterone, low renin hypertension, state of inappropriate secretion of, 816 (Abst.)

and cortisol in pregnant women, postural influences on circadian rhythms of urinary electrolyte, 996 (Abst.)

Aldosterone-producing tumors (APT) by scintillation scanning (SS) employing tracer amounts of ^{131}iodocholesterol, visualization of, 814 (Abst.)

Aldosteronism, effects of stilbesterol on renal pressor system as modified by adrenalectomy and secondary, 30

Alveolar plateau, lost on the, 1009 (Abst.)

Amino acid concentrations between plasma and erythrocytes; studies in normal human subjects and those with metabolic disorders, comparison of, 517

sequences of two urinary proteins characteristic of tubular proteinemia, partial, 822 (Abst.)

transport in late gestation in guinea pig, increase in maternal gut, 827 (Abst.)

Ammonia production in kidney, relation of gluconeogenesis to, 824 (Abst.)

Amphotericin B nephrotoxicity with renal tubular acidosis, experimental model of, 713

*July, pp. 1-180, August, pp. 181-332; September, pp. 323-498; October, pp. 499-682; November, pp. 683-858; December pp. 859-1056.

Amyloid from normal human skin, soluble precursor of, 855 (Abst.)
Analgesics containing phenacetin, methemoglobin formation in patients with renal disease associated with abuse of, 810 (Abst.)
Anemia, lipemia in rodent iron deficiency, 546
regional blood flow in acute dextran-exchange, 801 (Abst.)
Angina pectoris in candidates for saphenous vein bypass graft, results of medical management of, 794 (Abst.)
Angiotensin binding by receptor-like factors in plasma from seriously ill patients and experimental dog model, 816 (Abst.)
response, effect of prolactin on blood pressure, blood volume, and, 795 (Abst.)
Antibodies with specificity for γE, human, 979 (Abst.)
Antigen dose in human immune response; dose-response relationships in human immune response to Keyhole limpet hemocyanin, 61
in vitro response of human bone marrow cells to, 852 (Abst.)
Antilymphocyte sera (ALS) by a new in vitro assay, prediction of in vivo efficacy of, 857 (Abst.)
α-1-Antitrypsin deficiency, liver in noncirrhotic, 1012 (Abst.)
Arginine-induced insulin release in man, adrenergic effects which modify, 990 (Abst.)
Arterial pressure changes during hemodialysis, mechanism of acute, 1014 (Abst.)
Arteriosclerosis: calcification and lipid content, coronary, 795 (Abst.)
Arthritic patients, inorganic pyrophosphate concentrations in synovial fluids of, 216
Aspartate aminotransferase (GOT) from young and old human erythrocytes, 736
Aspergillosis, allergic bronchopulmonary, is not rare, 1007 (Abst.)
Atropine, ionic movement across gastric mucosa of man: reproducibility and effect of intravenous, 753

B

Basophil counting and its use as in vitro test for clinical atopy, new method for absolute, 842 (Abst.)
Beta-lactamase, immunologic distinction of mycobacterial, 982 (Abst.)
Bile acids in extrahepatic biliary atresia, formation and metabolism of, 181
in man: comparative effects of cholestyramine and ileal exclusion on cholesterol metabolism, interruption of enterohepatic circulation of, 94
Bile acids—Cont'd
and microflora in human small intestine, patterns of, 829 (Abst.)
output induced by endogenous cholecystokinin in health: effects of cholecystectomy or vagotomy, 828 (Abst.)
evidence for single excretory system, competition by unconjugated and conjugated sulfobromophthalein sodium (BSP) for transport into, 230
Biliary atresia, formation and metabolism of bile acids in extrahepatic, 181
Blood hypercoagulability, thrombosis, and acute myocardial infarction, 798 (Abst.)
pressure, blood volume, and angiotensin response, effect of prolactin on, 795 (Abst.)
-lowering effect, antihypertensive action of renomedullary prostaglandins (PGE_2 and PGA_2) in spontaneously hypertensive rat (SH rat): evidence for indirect, 803 (Abst.)
rheological abnormalities complicating blood hypercoagulable/thrombotic states, 844 (Abst.)
samples from rats, simple method for obtaining, 172
urea nitrogen, dietary calcium intake, time on dialysis and other variables, calcium absorption in renal failure: its relationship to, 380
volume, and angiotensin response, effect of prolactin on blood pressure, 795 (Abst.)
Bone collagen-mineral maturation in chronic uremia, 1000 (Abst.)
marrow cells to antigen, in vitro response of human, 852 (Abst.)
quantitative ^{45}Ca autoradiography of human, 585
Bovine endometrium, demonstration and properties of soluble cAMP protein in, 823 (Abst.)
Bowel disease, enterobacterial common antigen-induced lymphocyte reactivity in inflammatory, 826 (Abst.)
Bradykinin, prostaglandin may mediate renal vasodilator action of, 1016 (Abst.)
Bronchopulmonary aspergillosis, allergic, is not rare, 1007 (Abst.)

C

Calciferol metabolism: comparison of species distribution and chromatographic separation of vitamin D metabolites, studies on, 561
Calcitonin assay in family studies for medullary thyroid carcinoma, diagnostic dependability of, 817 (Abst.)
Calcium absorption in man: effect of intravenously infused calcium, relationship between serum calcium level and, 1002 (Abst.)

Calcium absorption—Cont'd
in renal failure: its relationship to blood urea nitrogen, dietary calcium intake, time on dialysis and other variables, 380
binding protein from parathyroid gland, 821 (Abst.)
homeostasis: interrelationship of roles of parathyroid glands and adrenal cortex, 812 (Abst.)
intake, time on dialysis and other variables, calcium absorption in renal failure: its relationship to blood urea nitrogen, dietary, 380
mechanism of adaptation of intestinal calcium absorption to low dietary, 813 (Abst.)
in osteoporosis, effect of combined therapy with sodium fluoride, vitamin D, and, 994 (Abst.)
removal with calcium-free peritoneal dialysis, factors affecting, 389
transport, role of sodium in intestinal, 1014 (Abst.)
cAMP binding protein in bovine endometrium, demonstration and properties of a soluble, 823 (Abst.)
Cancer, immunohistology of early and advanced, 852 (Abst.)
Canine factor XI (plasma thromboplastin antecedent) deficiency, 746
liver, extraction and excretion of renin by isolated, 1003 (Abst.)
tibial diaphysis, comparison of ^{125}I-antipyrine washout in marrow and cortex of, 802 (Abst.)
Carbamyl phosphate mediated inhibition of sickling of erythrocytes in whole blood in vitro from sickle cell anemia patients, 843 (Abst.)
Carbenicillin activity in vitro against *Proteus mirabilis*, effect of pH on, 984 (Abst.)
Carbohydrate-binding activity from rat tissues, soluble, 829 (Abst.)
Carboxylase in skin fibroblasts from patient with propionicacidemia, activation of propionyl-CoA, 1004 (Abst.)
Cardiac failure following coronary embolization in dog, effects of dopamine in, 804 (Abst.)
output, relationship of myocardial blood flow (MBF) to, 801 (Abst.)
Cardiovascular effects of heroin in dog, 794 (Abst.)
L-Carnitine in normal and diphtheritic perfused guinea pig heart, palmitate oxidation: effect of, 796 (Abst.)
Castor oil, and sodium ricinoleate: their effects on electric slow waves of the colon, diarrhea, 828 (Abst.)
Catecholamines, binding of, to human serum albumin, 810 (Abst.)
in thyrotoxic patients, studies of reputed augmentation of cardiovascular responses to, 809 (Abst.)
Cell division, histone phosphorylation and, 992 (Abst.)
Cellular pH in potassium depletion, 1013 (Abst.)
Chemotaxis associated with serum inhibitor in cirrhotic patients, defective, 980 (Abst.)
Chest wall compliance in normal subjects, evaluation of methods of determining, 1006 (Abst.)
Chloride deprivation, effect of adrenalectomy on renal response to, 1017 (Abst.)
Chlorpromazine-sensitive marrow cells, studies on agranulocytosis; biochemical defect in, 435
Cholecystectomy or vagotomy, bile acid output induced by endogenous cholecystokinin in health: effects of, 828 (Abst.)
Cholecystokinin in health: effects of cholecystectomy or vagotomy, bile acid output induced by endogenous, 828 (Abst.)
pancreozymin, dose-related response of pancreatic synthesis and secretion to, 149
Cholesterol-ester storage disease, deficient activity of acid lipase in, 988 (Abst.)
metabolism, interruption of enterohepatic circulation of bile acids in man: comparative effects of cholestyramine and ileal exclusion on, 94
Cholestyramine and ileal exclusion on cholesterol metabolism, interruption of enterohepatic circulation of bile acids in man: comparative effects of, 94
inhibition of intestinal absorption of inorganic and hemoglobin iron by, 70
Chromosome, in vitro growth of leukemic cells containing Philadelphia (Ph 1), 838 (Abst.)
Circadian rhythms of urinary electrolyte, aldosterone, and cortisol in pregnant women, postural influences on, 996 (Abst.)
CO_2 production in proximal and distal segments of human duodenum, acid loss and, 832 (Abst.)
Cobalamin coenzymes by human cells in tissue culture, synthesis of, 302
Collagen metabolism, effect of zinc deficiency on, 853 (Abst.)
Colon; clinical application of new technique, tissue cytogenetic studies in chronic ulcerative colitis and carcinoma of, 835 (Abst.)
diarrhea, castor oil, and sodium ricinoleate: their effect on electric slow waves of, 828 (Abst.)
Complement deposition in diabetic rats, spontaneous glomerular immunoglobin and, 1017 (Abst.)

Complement—Cont'd
fixing and hemolytic properties of certain erythrocyte autoantibodies, 843 (Abst.)
Connective tissue activation in vitro: suppression by antirheumatic drugs, 851 (Abst.)
Coronary artery bypass surgery, incidence, mortality rate, and sequelae of myocardial infarction immediately after, 802 (Abst.)
disease, platelet function in, 807 (Abst.)
circulation, use of technetium-labelled human albumin microspheres for studies of, 807 (Abst.)
embolization in dog, effects of dopamine in cardiac failure following, 804 (Abst.)
Corticosteroids and lymphoid cells in vitro: hydrocortisone lysis of human, guinea pig, and thymus cells, 499
Cortisol in pregnant women, postural influences on circadian rhythms of urinary electrolyte, aldosterone, and, 996 (Abst.)
kinetics and plasma insulin in hirsute women, 987 (Abst.)
metabolizing enzymes, essential hypertension: evidence for altered activity of, 820 (Abst.)
Cyclophosphamide, augmented incidence of neoplasia in female New Zealand black/New Zealand white (NZB/NZW) mice treated with long-term, 978 (Abst.)

D

Delirium tremens with urea (or dexamethasone) and magnesium sulfate, therapy of, 990 (Abst.)
Dextran-exchange anemia, regional blood flow in acute, 801 (Abst.)
Diabetes, abnormal growth hormone (GH) secretion in ketosis-prone, 993 (Abst.)
and glucose intolerance in fluctuant hearing loss, high incidence of, 995 (Abst.)
insipidus caused by histiocytosis X, patterns of anti-diuretic function in, 194
mellitus, water-conserving biologic adaptation in renal papilla, which is stimulated by massive osmotic, diuresis of, 1013 (Abst.)
increased platelet aggregation in, 844 (Abst.)
Diabetic patients, oxidative metabolism of leukocytes from nondiabetic and, 158
Dialysis, factors affecting calcium removal with calcium-free peritoneal, 389
and other variables, calcium absorption in renal failure: its relationship to blood urea nitrogen, dietary calcium intake, time on, 380
Dialysis—Cont'd
pulmonary shunting and decreased arterial-mixed venous oxygen content difference in uremia: effects of, 1016 (Abst.)
Diarrhea, castor oil, and sodium ricinoleate: their effect on electric slow waves of colon, 828 (Abst.)
in Chicago, toxigenic *Escherichia coli* in infantile, 981 (Abst.)
in man, studies on enterotoxin from *Escherichia coli* associated with acute, 81
Dietetics, analytic versus biologic, 999 (Abst.)
Diethylstilbesterol (DIES) in Duchenne's muscular dystrophy (DMD), serum enzyme lowering and other effects of, 797 (Abst.)
Digoxin, enzymatic assay of plasma, 779
Dihydrotestosterone in patient with testicular feminization, gonadal and peripheral venous levels of, 825 (Abst.)
2,3-Diphosphoglycerate (2,3-DPG), effect of hyperoxia on red blood cell (RBC), 841 (Abst.)
of stored blood, pyruvate effect in maintenance of ATP and, 472
Disodium ethane-1,1-diphosphonate, treatment of osteoporosis with, 574
Diuresis of diabetes mellitus, water-conserving biologic adaptation in renal papilla, which is stimulated by massive osmotic, 1013 (Abst.)
effects of water and furosemide-induced, on acquisition and course of experimental pyelonephritis, 130
Dog(s), cardiovascular effects of heroin in, 794 (Abst.)
chronic intravascular coagulation in, 839 (Abst.)
effects of dopamine in cardiac failure following coronary embolization in, 804 (Abst.)
induction of immunologically mediated unilateral glomerular lesion in split-bladder, 1021 (Abst.)
limb blood flow, segmental vascular resistances, and venous compliance in renal hypertensive, 805 (Abst.)
model, angiotensin binding by receptor-like factors in plasma from seriously ill patients and experimental, 816 (Abst.)
with venous thrombosis, plasmin generation in, 1002 (Abst.)
during volume expansion, comparison of alteration in proximal tubular sodium reabsorption in normal and vena caval, 1020 (Abst.)
L-Dopa, inhibition of prolactin secretion and successful therapy of Forbes-Albright syndrome with, 824 (Abst.)
Dopamine in cardiac failure following coronary embolization in dog, effects of, 804 (Abst.)

Duodenum, acid loss and CO_2 production in proximal and distal segments of human, 832 (Abst.)

E

Egg vitamin B_{12} in postagastrectomy and achlorhydric patients, impaired absorption of, 839 (Abst.)
Either-or, 859
Emphysema in rat, evolution of papain, 509
Endocarditis, *Staphylococcus aureus*, 984 (Abst.)
Endotoxin, quantitative comparison of in vitro and in vivo methods for detection of, 138
Enterotoxin from *Escherichia coli* associated with acute diarrhea in man, 81
Enzyme activity and mineral content of pancreatic secretions, 832 (Abst.)
systems, simplified method for radioimmunoassay of, 309
Epinephrine injection, stimulation of erythrocyte glycolysis by fear and, 837 (Abst.)
Erythrocyte(s), aspartate aminotransferase (GOT) from young and old human, 736
autoantibodies, complement-fixing and hemolytic properties of certain 843 (Abst.)
glutathione oxidation and biophysical aspects of injury to human, 533
glycolysis by fear and epinephrine injection, stimulation of, 837 (Abst.)
lipid, morphologic study: sea-blue histiocyte (SBH) viewed as defective cell unable to process, 841 (Abst.)
preserved in liquid nitrogen, rheologic properties of, 175
studies in normal human subjects and those with metabolic disorders, comparison of amino acid concentrations between plasma and, 517
in whole blood in vitro from sickle cell anemia patients, carbamyl phosphate mediated inhibition of sickling of, 843 (Abst.)
Erythropoiesis, mechanism of endocrine influences on, 20
Erythropoiesis-stimulating factor (ESF)–generating factor (EGF) in presence of erythropoietin (ESF), selective membrane filtration of, 845 (Abst.)
Erythropoietin by neuraminidase in vivo, inhibition of biologic activity of, 765
(Ep) production in rats, effects of age and sex on extrarenal, 848 (Abst.)
regulation of plasma erythropoietin levels in mice with impaired responsiveness to, 449
release, effect of hemolysates on red cell production and, 1
Erythropoietin—Cont'd
the selective membrane filtration of erythropoiesis-stimulating factor (ESF)–generating factor (EGF) in the presence of, 845 (Abst.)
sensitive stem cells, effect of serum from myeloproliferative disorders on, 849 (Abst.)
Escherichia coli associated with acute diarrhea in man, 81
in infantile diarrhea in Chicago, toxigenic, 981 (Abst.)
Ethanol, stimulation of jejunal adenyl cyclase by, 336
Ethylene diamine tetra-acetic acid, atomic absorption determination of lead in blood and urine in presence of, 664
Excretory system, competition by unconjugated and conjugated sulfobromophthalein sodium (BSP) for transport into bile: evidence for a single, 230

F

Fabry's disease: structural or regulatory mutation? 987 (Abst.)
correction of enzymatic deficiency by renal transplantation, treatment of, 989 (Abst.)
Factor VIII labelled with radioiodine: preparation and metabolic studies, 840 (Abst.)
Fetal iron and its heme-nonheme distribution, influence of maternal iron stores on source of, 997 (Abst.)
Fibrinogen fragments, limited proteolysis, new bleeding syndrome with circulating, 846 (Abst.)
Fibroblasts from patient with propionicacidemia, activation of propionyl-CoA carboxylase in skin, 1004 (Abst.)
5-Fluorouracil in rats, effect of prednisolone and other factors on catabolism of, 343
Follicle-stimulating hormone, LH, GH, and TSH by anti-FSH sera prepared by several immunization regimens, binding of tracer, 949
Forbes-Albright syndrome with L-dopa, inhibition of prolactin secretion and successful therapy of, 824 (Abst.)
Fructose metabolism in normal and fructose-intolerant subjects, quantitation of pathways of, 608
α-L-Fucosidase activity of human vascular tissue, 995 (Abst.)
Furosemide and salt in chronic renal failure, improvement of glomerular filtration rate (GFR) and renal plasma flow (RPF) by simultaneous administration of, 1018 (Abst.)
induced diuresis on acquisition and course of experimental pyelonephritis, effects of water and, 130

G

Galactose-1-phosphate in red blood cells, fluorometric method for assay of, 931

Gallbladder, absorption of organic compounds by injured, 255

Gastric mucosa of man: reproducibility and effect of intravenous atropine, ionic movement across, 753

Gentamycin, kanamycin, neomycin, streptomycin, and vancomycin in serum or plasma, rapid microassay of, 457

Gestation in guinea pig, increase in maternal gut amino acid transport in late, 827 (Abst.)

Globulin production: rise in antihemophilic globulin levels in hemophilic subject with acute lymphoblastic leukemia, role of lymphocyte in antihemophilic, 122

Glomerular filtration rate (GFR) and renal plasma flow (RPF) by simultaneous administration of furosemide and salt in chronic renal failure, improvement of, 1018 (Abst.)

immunoglobulin and complement deposition in diabetic rats, spontaneous, 1017 (Abst.)

lesion in split-bladder dog, induction of immunologically mediated unilateral, 1021 (Abst.)

Glucagon, effect of acute hyperkalemia on plasma insulin and, 1001 (Abst.)

Gluconeogenesis and glycogen formation, sex steroid influence on hepatic, 997 (Abst.)

relation of, to ammonia production in kidney, 824 (Abst.)

Glucose intolerance in fluctuant hearing loss, high incidence of diabetes and, 995 (Abst.)

oxidation by leukocytes incubated with sera from patients with rheumatoid arthritis and systemic lupus erythematosus (SLE), enhanced, 977 (Abst.)

α-Glutamyl transpeptidase in sputum, concerning source and distribution of, 1004 (Abst.)

Glutathione oxidation and biophysical aspects of injury to human erythrocytes, 533

Glycogen formation, sex steroid influence on hepatic gluconeogenesis and, 997 (Abst.)

Glycolate synthesis by hemic cells, oxalate and, 245

Glycolysis by fear and epinephrine injection, stimulation of erythrocyte, 837 (Abst.)

Glycolytic intermediates and pyridine nucleotides in peripheral blood cells, fluorometric analysis of, 969

Glycosphingolipids of membrane, new approach for determining red cell life span by incorporating C^{14} glucose into, 656

Granulocyte colony-stimulating factor, relationship to in vivo granulopoiesis, 53

Granulopoiesis, granulocyte colony-stimulating factor, relationship to in vivo, 53

Growth hormone and hydroxycorticosteroid response during surgery, plasma corticotropin (ACTH), 882

levels in partial and total lipoatrophy, elevated human, 1003 (Abst.)

relationships in kwashiorkor and the nephrotic syndrome, serum albumin and, 865

secretion in ketosisprone diabetes, abnormal, 993 (Abst.)

and TSH by anti-FSH sera prepared by several immunization regiments, binding of tracer FSH, LH, 949

Guinea pig heart, palmitate oxidation: effect of L-carnitine in normal and diphtheritic perfused, 796 (Abst.)

increase in maternal gut amino acid transport in late gestation in, 827 (Abst.)

lung, patterns of immunological damage to, 1010 (Abst.)

H

Hearing loss, high incidence of diabetes and glucose intolerance in fluctuant, 995 (Abst.)

^{3}H-digoxin by bundle of His and myocardium, uptake of, 799 (Abst.)

Hematopoiesis in patients undergoing chronic hemodialysis, effects of total nephrectomy on, 524

Heme-nonheme distribution, influence of maternal iron stores on source of fetal iron and, 997 (Abst.)

Hemic cells, oxalate and glycolate synthesis by, 245

Hemocyanin, antigen dose in human immune response, Dose-response relationships in human immune response to Keyhole limpet, 61

Hemodialysis, effects of total nephrectomy on hematopoiesis in patients undergoing chronic, 524

mechanism of acute arterial pressure changes during, 1014 (Abst.)

Hemoglobin (Hb Little Rock), effect of, on physiology of oxygen delivery, new, 837 (Abst.)

iron by cholestyramine, inhibition of intestinal absorption of inorganic and, 70

Hemolysates, effect of hemolysates on red cell production and erythropoietin release, 1

Hemophilic subject with acute lymphoblastic leukemia, role of lymphocyte in antihemophilic globulin production: rise in antihemophilic globulin levels in, 122
Hepatic porphobilinogen deaminase in normal and porphyric individuals, serum porphobilinogen and, 683
Heroin in dog, cardiovascular effects of, 794 (Abst.)
Herpes simplex virus in tissue culture by direct immunofluorescence, rapid identification of, 963
Herpesvirus encephalitis, quantitative measures of sensitivity of isolates and concentrations of idoxuridine in body fluids of patients with, 983 (Abst.)
Hirsutism, abnormalities of testosterone binding in women with, 818 (Abst.)
His and myocardium, the uptake of ^{3}H-digoxin by bundle of, 799 (Abst.)
Histamine, secretory effects of methylated metabolites of, 827 (Abst.)
Histiocyte (SBH) viewed as defective cell unable to process erythrocyte lipid: morphologic study, sea blue, 841 (Abst.)
Histiocytosis X, patterns of anti-diuretic function in diabetes insipidus caused by, 194
Histone phosphorylation and cell division, 992 (Abst.)
Hormone secretion, adrenergic control of, 820 (Abst.)
Human intestinal lactase, monosaccharide inhibition of, 265
  sex chromosome complement in poly morphonuclear leukocytes: new technique, identification of, 88
Hydrocortisone lysis of human, guinea pig, and thymus cells, corticosteroids and lymphoid cells, 499
Hydroxycorticosteroid response during surgery, plasma corticotropin (ACTH), growth hormone (GH), and 11-OHCS, 882
18-hydroxylase block: new form of steroid hypertension in man, testosterone-induced, 813 (Abst.)
Hyperalimentation syndrome, animal studies fatal, 918
Hyperkalemia on plasma insulin and glucagon, effect of acute, 1001 (Abst.)
Hyperoxia on red blood cell (RBC) 2,3-diphosphoglycerate (2,3-DPG), effect of, 841 (Abst.)
Hypersensitivity to enzyme additives in laundry detergent workers, 977 (Abst.)
Hypertension: evidence for altered activity of cortisol-metabolizing enzymes, essential, 820 (Abst.)
  in man, testosterone-induced 18-hydroxylase block: new form of steroid, 813 (Abst.)
Hypertension—Cont'd
  in rat, influence of acute sodium depletion on experimental, 369
  state of inappropriate secretion of aldosterone, low renin, 816 (Abst.)
  volume-dependent essential and steroid, 798 (Abst.)
Hypo-β-lipoproteinemia, study of polypeptides of serum lipoproteins in, 985 (Abst.)
Hypoparathyroidism, mitochondrial pyridine nucleotide redox kinetics in, 817 (Abst.)
Hypothalamic influences on prolactin secretion in man, 818 (Abst.)
Hypoxia, chronic, is it associated with reduction of leukemia-lymphoma incidence? 855 (Abst.)
  effect of physical conditioning on cardiac response to, 806 (Abst.)

I

^{125}I-antipyrine washout in marrow and cortex of canine tibial diaphysis, comparison of, 802 (Abst.)
^{131}I-19-iodocholesterol in diagnosis of adrenal disease, 986 (Abst.)
Idoxuridine in body fluids of patients with herpesvirus encephalitis, quantitative measures of sensitivity of isolates and concentrations of, 983 (Abst.)
IgG fragments, biologic activity of LATS-positive, 821 (Abst.)
Immunoadsorption, isolation of human factor IX by, 846 (Abst.)
Immunofluorescence, rapid identification of *Herpes simplex* virus in tissue culture by direct, 963
Immunoglobulin and complement deposition in diabetic rats, spontaneous glomerular, 1017 (Abst.)
Immunologic recovery, spontaneous or induced? 854 (Abst.)
Inspiratory muscle function, influence of increased functional residual capacity on, 1005 (Abst.)
Insulin combinations in normal fasted man, effects of low doses of intravenous proinsulin and, 991 (Abst.)
  release in man, adrenergic effects which modify arginine-induced, 990 (Abst.)
Intestinal absorption of inorganic and hemoglobin iron by cholestyramine, inhibition of, 70
  calcium absorption to low dietary calcium, mechanism of adaptation of, 813 (Abst.)
  lactase, monosaccharide inhibition of human, 265
Intestine, patterns of bile acids and microflora in human small, 829 (Abst.)
Intracellular killing, modified assay of neutrophil function: use of lysostaphin to differentiate defective phagocytosis from impaired, 316

^{131}Iodocholesterol, visualization of aldosterone-producing tumors (APT) by scintillation scanning (SS) employing tracer amounts of, 814 (Abst.)
Iron deficiency anemia, lipemia in rodent, 546
interrelation of intestinal transport system for manganese and, 642
stores on source of fetal iron and its heme-nonheme distribution, influence of maternal, 997 (Abst.)
Isoferritin from liver and reticulocytes, characteristics of, 836 (Abst.)
Isoproterenol, propranolol, and practolol in asthmatic and normal subjects, comparison of respiratory and cardiovascular effects of, 1012 (Abst.)

K

Kanamycin, neomycin, streptomycin, and vancomycin in serum or plasma, rapid microassay of gentamycin, 457
Ketosis-prone diabetes, abnormal growth hormone (GH) secretion in, 993 (Abst.)
Kidney function in pregnant rat, 633
homograft recipients and in normal subjects, acute renal response to large doses of intravenous prednisolone in, 39
mitochondria, sodium-stimulated adenosine triphosphatase (ATPase) activity of, 1021 (Abst.)
relation of gluconeogenesis to ammonia production in the, 824 (Abst.)
Kwashiorkor and nephrotic syndrome, serum albumin and growth hormone relationships in, 865

L

Lactase, monosaccharide inhibition of human intestinal, 265
Lactic acidemia, effects of hypertonic solutions infused intravenously in rabbits, metabolic acidosis and, 619
Lactulose therapy in chronic renal failure, 1015 (Abst.)
Lead in blood and urine in presence of EDTA, atomic absorption determination of, 664
and lead-endotoxin combinations, sensitivity of adrenalectomized rats to, 981 (Abst.)
Leukemia (CLL), cell-free protein synthesis by ribosomes from blood lymphocytes of normals and patients with chronic lymphocytic, 847 (Abst.)
effect of lymphotoxic factor in sera of patients with multiple sclerosis and acute, on metabolism of normal and leukemic lymphocytes, 508
Leukemia—Cont'd
lymphoma incidence, is chronic hypoxia associated with reduction of, 855 (Abst.)
nonleukemic elevation of serum vitamin B^{12} and B^{12} binding capacity levels resembling that in chronic myelogenous leukemia, 289
role of lymphocyte in antihemophilic globulin production: rise in antihemophilic globulin levels in hemophilic subject with acute lymphoblastic, 122
serum transcobalamin in myeloid, 275
Leukocyte function and metabolism, sulfone effects on, 850 (Abst.)
incubated with sera from patients with rheumatoid arthritis and systemic lupus erythematosus (SLE), enhanced glucose oxidation by, 977 (Abst.)
neuraminidase activity in human, 771
new technique, identification of human sex chromosome complement in polymorphonuclear, 88
from nondiabetic and diabetic patients, oxidative metabolism of, 158
production and release: appearance of leukocytosis-inducing factor following treatment with antilymphocytic serum, mechanisms of, 363
proliferation in vitro to purified staphylococcal protein A, 985 (Abst.)
Leukocytosis-inducing factor following treatment with anti-lymphocyte serum, mechanisms of leukocyte production and release, appearance of, 363
Lipase in cholesterol-ester storage disease, deficient activity of acid, 988 (Abst.)
metabolic control of kinetic properties of lipoprotein, 809 (Abst.)
Lipemia in man, propranolol and alimentary, 986 (Abst.)
in rodent iron deficiency anemia, 546
Lipoatrophy, elevated human growth hormone (HGH) levels in partial and total, 1003 (Abst.)
Lipolysis, further observations on role of the adenyl cyclase-cyclic AMP (CAMP) system in human, 989 (Abst.)
Lipoprotein lipase, metabolic control of kinetic properties of, 809 (Abst.)
Lipoproteins, distribution of beta-lipo-protein between low-density and very low-density, 994 (Abst.)
Liquid nitrogen, rheologic properties of erythrocytes preserved in, 175
Liver, extraction and excretion of renin by isolated canine, 1003 (Abst.)
in noncirrhotic α-1-antitrypsin deficiency, 1012 (Abst.)
and reticulocytes, characteristics of isoferritin from, 836 (Abst.)

Lung ventilation and perfusion, effect of age on regional, 1008 (Abst.)
Lupus erythematosus (SLE), enhanced glucose oxidation by leukocytes incubated with sera from patients with rheumatoid arthritis and systemic, 977 (Abst.)
Luteinizing hormone, GH, and TSH by anti-FSH sera prepared by several immunization regiments, binding of tracer FSH, 949
Lymphocytes in aging NZB mice, alteration of receptor-carrying, 850 (Abst.)
in antihemophilic globulin production: rise in antihemophilic globulin levels in hemophilic subject with acute lymphoblastic leukemia, role of, 122
effect of lymphotoxic factor in sera of patients with multiple sclerosis and acute leukemia on metabolism of normal and leukemic, 508
of normals and patients with chronic lymphocytic leukemic (CLL), cell-free protein synthesis by ribosomes from blood, 847 (Abst.)
reactivity in inflammatory bowel disease, enterobacterial common antigen-induced, 826 (Abst.)
stimulation by cyclic AMP, GMP, and related compounds, comparison of human, 856 (Abst.)
transformation, transfer RNA's and human, 555
Lymphoid cells in vitro, hydrocortisone lysis of human, guinea pig, and thymus cells, corticosteroids and, 499
Lymphoma incidence, is chronic hypoxia associated with reduction of leukemia? 855 (Abst.)
Lysostaphin to differentiate defective phagocytosis from impaired intracellular killing, modified assay of neutrophil function: use of, 316

M

Magnesium sulfate, therapy of delirium tremens with urea (or dexamethasone) and, 990 (Abst.)
Malaria parasites, detection of partial masking of drug receptor in, 983 (Abst.)
Manganese and iron, interrelation of intestinal transport system for, 642
Manometry: new method of sphincter assessment, circumferential, 834 (Abst.)
Marrow cells, studies on agranulocytosis: biochemical defect in chlorpromazine-sensitive, 435
Mast cells, in vitro reactions of human respiratory, 857 (Abst.)
Metabolism, sulfone effects on leukocyte function and, 850 (Abst.)
Methemoglobin formation in patients with renal disease associated with abuse of analgesics containing phenacetin, 810 (Abst.)
Methicillin (MC) resistance in *Staphylococcus epidermidis*, 980 (Abst.)
Methyldopa: prospective study, immunologic findings in patients receiving, 905
Mice, alteration of receptor-carrying lymphocytes (RCL) in aging NZB, 850 (Abst.)
Monosaccharide inhibition of human intestinal lactase, 265
Mouse: morphologic and autoradiographic studies, small intestinal injury in immunologically runted, 833 (Abst.)
Multiple sclerosis and acute leukemia on metabolism of normal and leukemic lymphocytes, effect of lymphotoxic factor in sera of patients with, 508
Muscular dystrophy (DMD), serum enzyme lowering and other effects of diethylstilbesterol (DIES) in Duchenne's, 797 (Abst.)
Myelogenous leukemia, nonleukemic elevation of serum vitamin B_{12} and B_{12} binding capacity levels resembling that in chronic, 289
Myeloid leukemia, serum transcobalamin in, 275
Myeloma with IgG (λ) and IgA (λ) serum M-components: immunohistologic studies, multiple, 847 (Abst.)
Myocardial blood flow (MBF) to cardiac output, relationship of, 801 (Abst.)
infarction, blood hypercoagulability, thrombosis, and, 798 (Abst.)
immediately after coronary artery bypass surgery, incidence, mortality rate and sequelae of, 802 (Abst.)
myocardial zinc and other cation composition in experimental, 804 (Abst.)
Myocardium, uptake of ^{3}H-digoxin by the bundle of His and, 799 (Abst.)

N

Neomycin, streptomycin, and vancomycin in serum or plasma, rapid microassay of gentamycin, kanamycin, 457
Nephrotic syndrome, serum albumin and growth hormone relationships in kwashiorkor and, 865
Neuraminidase activity in human leukocytes, 771
in vivo, inhibition of biologic activity of erythropoietin by, 765
Neurohypophyseal function in rat: studies with new radioimmunoassay for plasma vasopressin, 815 (Abst.)

Neutrophil function: use of lysostaphin to differentiate defective phagocytosis from impaired intracellular killing, modified assay of, 316
Nicotine, experimental study in rat, proulcer effect of, 831 (Abst.)
Nitrogen, rheologic properties of erythrocytes preserved in, 175
Nondiabetic and diabetic patients, oxidative metabolism of leukocytes from, 158

O

Organic compounds by injured gallbladder, absorption of, 255
Osteogenesis imperfecta, morphological and biochemical studies in, 1000 (Abst.)
Osteoporosis, effect of combined therapy with sodium fluoride, vitamin D, and calcium in, 994 (Abst.)
treatment of, with disodium ethane-1, 1-diphosphonate, 574
Oxalate and glycolate synthesis by hemic cells, 245
Oxygen delivery, effect of new hemoglobin (Hb Little Rock) on physiology of, 837 (Abst.)
inhalation (Berggren) and xenon-133 methods, pulmonary shunt determination: comparison between, 785
Oxyhemoglobin dissociation curve, clinical significance of acute changes in, 1011 (Abst.)

P

Palmitate oxidation: effect of L-carnitine in normal and diphtheritic perfused guinea pig heart, 796 (Abst.)
Pancreatic secretions, enzyme activity and mineral content of, 832 (Abst.)
synthesis and secretion to cholecystokinin-pancreozymin, dose-related response of, 149
Pancreozymin, dose-related response of pancreatic synthesis and secretion to cholecystokinin, 149
Papain emphysema in rat, evolution of, 509
Parathyroid glands and adrenal cortex, calcium homeostasis: interrelationship of roles of, 812 (Abst.)
calcium binding from, 821 (Abst.)
immunoreactive peptides: evidence for proparathormone, human, 825 (Abst.)
hormone (PTH) in man, fractionation of circulating, 814 (Abst.)
secretion in sheep, metabolic acidosis and, 819 (Abst.)
Peptides, evidence for proparathormone, human parathyroid gland immunoreactive, 825 (Abst.)
Perfusion, effect of age on regional lung ventilation and, 1008 (Abst.)
Phagocytosis from impaired intracellular killing, modified assay of neutrophil function: use of lysostaphin to differentiate defective, 316
effects of surface structure on, 982 (Abst.)
Phenacetin, methemoglobin formation in patients with renal disease associated with abuse of analgesics containing, 810 (Abst.)
Plasma corticotropin (ACTH), growth hormone (GH), and 11-OHCS (hydroxycorticosteroid) response during surgery, 882
digoxin, enzymatic assay of, 779
and erythrocytes: studies in normal human subjects and those with metabolic disorders, comparison of amino acid concentrations between, 517
erythropoietin levels in mice with impaired responsiveness to erythropoietin, regulation of, 449
insulin and glucagon, effect of acute hyperkalemia on, 1001 (Abst.)
in hirsute women, cortisol kinetics and, 987 (Abst.)
and platelet fibrin-stabilizing factor, purification and subunit structure of human, 848 (Abst.)
rapid microassay of gentamycin, kanamycin, neomycin, streptomycin, and vancomycin in serum or, 457
from seriously ill patients and experimental dog model, angiotensin binding by receptor-like factors in, 816 (Abst.)
vasopressin, neurohypophyseal function in rat: studies with new radioimmunoassay for, 815 (Abst.)
Plasmin generation in dogs with venous thrombosis, 1002 (Abst.)
Plasminogen activator and human urokinase, dissimilarity of human vascular, 354
Platelet aggregation in diabetes mellitus, increased, 844 (Abst.)
influence of cytochalasin B (CB) on, 849 (Abst.)
fibrin-stabilizing factor, purification and subunit structure of human plasma and, 848 (Abst.)
function in coronary artery disease, 807 (Abst.)
soluble, magnesium-depleted, calcium-inhibited ATPase in human, 483
Pleural effusion, P_{O_2}, P_{CO_2}, and pH in, 1006 (Abst.)
Pneumonitis due to contaminated home environments, hypersensitivity, 853 (Abst.)
Polyphloretin phosphate (PPP), on basal and stimulated thyroid function, effects of prostaglandin antagonist, 823 (Abst.)
Porphobilinogen, deaminase in normal and porphyric individuals, serum porphobilinogen and hepatic, 683

Postgastrectomy and achlorhydric patients, impaired absorption of egg vitamin B_{12} in, 839 (Abst.)
Potassium depletion, cellular pH in, 1013 (Abst.)
mechanism of the vasodilator action of, 797 (Abst.)
Practolol in asthmatic and normal subjects, comparison of respiratory and cardiovascular effects of isoproterenol, propranolol, and, 1012 (Abst.)
Prednisolone, effect of, on catabolism of 5-fluorouracil in rats, 343
in kidney homograft recipients and in normal subjects, acute renal response to large doses of intravenous, 39
Proinsulin levels in insulin-requiring diabetic patients, elevated circulating, 811 (Abst.)
and insulin combinations in normal fasted man, effects of low doses of intravenous, 991 (Abst.)
Prolactin, effect of, on blood pressure, blood volume, and angiotensin response, 795 (Abst.)
secretion in man, hypothalamic influences on, 818 (Abst.)
and successful therapy of the Forbes-Albright syndrome with L-dopa, inhibition of, 824 (Abst.)
Proparathormone, human parathyroid gland immunoreactive peptides: evidence for, 825 (Abst.)
Propionicacidemia, activation of propionyl-CoA carboxylase in skin fibroblasts from patient with, 1004 (Abst.)
Propionyl-CoA carboxylase in skin fibroblasts from patient with propionicacidemia, activation of, 1004 (Abst.)
Propranolol and alimentary lipemia in man, 986 (Abst.)
and practolol in asthmatic and normal subjects, comparison of respiratory and cardiovascular effects of isoproterenol, 1012 (Abst.)
Prostaglandin antagonist, polyphloretin phosphate (PPP), on basal and stimulated thyroid function, effects of, 823 (Abst.)
E-1 (PGE-1) by cerebral and cerebellar homogenates, metabolism of, 998 (Abst.)
may mediate renal vasodilator action of bradykinin, a 1016 (Abst.)
(PGE_2 and PGA_2) in spontaneously hypertensive rat (SH rat): evidence for indirect blood-pressure-lowering effect, antihypertensive action of renomedullary, 803 (Abst.)
Protein, adaptation of urea synthesis to dietary, 830 (Abst.)
Proteinemia, partial amino acid sequences of two urinary proteins characteristic of tubular, 822 (Abst.)
Proteinuria and renal protein clearances in patients with renal tubular disorders, 203
Proteus mirabilis, effect of pH on carbenicillin activity in vitro against, 984 (Abst.)
Protoporphyria: study of factors involved in labelling of porphyrins and bile pigments from ALA-^{3}H and glycine-^{14}C, erythropoietic defects in, 411
Pulmonary function differences in normal smoking and nonsmoking, middle-aged, white-collar workers, 1009 (Abst.)
shunt determination: comparison between oxygen inhalation (Berggren) and xenon-133 methods, 785
shunting and decreased arterial-mixed venous oxygen content difference in uremia: effects of dialysis, 1016 (Abst.)
Pyelonephritis, cellular kinetics of immune response in, 891
effects of water and furosemide-induced diuresis on acquisition and course of experimental, 130
Pyridine nucleotides in peripheral blood cells, fluorometric analysis of glycolytic intermediates and, 969
redox kinetics in hypoparathyroidism, mitochondrial, 817 (Abst.)
Pyrimidine biosynthesis, mechanism of allopurinol-medicated inhibition of, 696
Pyroglobulin, role of hydrophobic bonding in thermoprecipitation of, 979 (Abst.)
Pyrophosphate concentrations in synovial fluids of arthritic patients, inorganic, 216
Pyruvate effect in maintenance of ATP and 2, 3-DPG of stored blood, 472

R

Rabbits: metabolic acidosis and lactic acidemia, effects of hypertonic solutions infused intravenously in, 619
Radioimmunoassay of enzyme systems, simplified method for, 309
Radioiodine: preparation and metabolic studies, factor VIII labelled with, 840 (Abst.)
Radiopaque dyes on renal vascular resistance, effects of, 705
Rat(s), effects of age and sex on extrarenal erythropoietin (Ep) production in, 848 (Abst.)
kidney function in pregnant, 633
neutralization of intestinal flora and development of germ-free-like characteristics in antibiotic treated conventional, 834 (Abst.)
pressor effects of tailcuff method in awake normotensive and hypertensive, 675

Rat(s)—Cont'd
pro-ulcer effect of nicotine, experimental study in, 831 (Abst.)
sensitivity of adrenalectomized, to lead and lead-endotoxin combinations, 981 (Abst.)
(SH rat): evidence for indirect blood-pressure–lowering effect, antihypertensive action of renomedullary prostaglandins (PGE_2 and PGA_2) in spontaneously hypertensive, 803 (Abst.)
simple method for obtaining blood samples from, 172
spontaneous glomerular immunoglobulin and complement deposition in diabetic, 1017 (Abst.)
studies with new radioimmunoassay for plasma vasopressin, neurohypophyseal function in, 815 (Abst.)
tissues, soluble carbohydrate-binding activity from, 829 (Abst.)
validity of indirect tail-cuff method for determining systolic arterial pressure in unanesthetized normotensive and spontaneously hypertensive, 957
Red blood cell (RBC) 2,3-diphosphoglycerate (2,3-DPG), effect of hyperoxia on, 841 (Abst.)
fluorometric method for assay of galactose-1-phosphate in, 931
cell life span by incorporating C^{14} glucose into glycosphingolipids of membrane, new approach for determining, 656
membranes in abetalipoproteinemia: deficiency of lecithin: cholesterol acyltransferase, relationship between serum lipoproteins and, 323
phosphate compounds, automated chromatographic analysis of acid-soluble, 939
production and erythropoietin release, effect of hemolysates on, 1
relationship with use of a new immunologic marker, study of malarial parasite, 167
Renal failure, improvement of glomerular filtration rate (GFR) and renal plasma flow (RPF) by simultaneous administration of furosemide and salt in chronic, 1018 (Abst.)
its relationship to blood urea nitrogen, dietary calcium intake, time on dialysis and other variables, calcium absorption in, 380
lactulose therapy in chronic, 1015 (Abst.)
papilla, which is stimulated by massive osmotic diuresis of diabetes mellitus, water-conserving biologic adaptation in, 1013 (Abst.)
Renal—Cont'd
plasma flow (RPF) by simultaneous administration of furosemide and salt in chronic renal failure, improvement of glomerular filtration rate (GFR) and, 1018 (Abst.)
pressor system as modified by adrenalectomy and secondary aldosteronism, effects of stilbesterol on, 30
protein clearances in patients with renal tubular disorders, proteinuria and, 203
response to chloride deprivation, effect of adrenalectomy on, 1017 (Abst.)
to large doses of intravenous prednisolone in kidney homograft recipients and in normal subjects, acute, 39
transplantation, treatment of Fabry's disease: correction of enzymatic deficiency by, 989 (Abst.)
tubular acidosis, experimental model of amphotericin B nephrotoxicity with, 713
disorders, proteinuria and renal protein clearances in patients with, 203
vascular resistance, effects of radiopaque dyes on, 705
vasodilator action of bradykinin, prostaglandin may mediate, 1016 (Abst.)
vein catheterization without urine collection: its diagnostic value in experimental renovascular hypertension, estimation of separated filtration fraction with use of, 8
Renin by isolated canine liver, extraction and excretion of, 1003 (Abst.)
hypertension: state of inappropriate secretion of aldosterone, low, 816 (Abst.)
Renovascular hypertension, estimation of separated filtration fraction with use of renal vein catheterization without urine collection: its diagnostic value in experimental renovascular hypertension, 8
Reticulocytes, characteristics of isoferritin from liver and, 836 (Abst.)
Rheumatoid arthritis and systemic lupus erythematosus (SLE), enhanced glucose oxidation by leukocytes incubated with sera from patients with, 977 (Abst.)

S

Salt in chronic renal failure, improvement of glomerular filtration rate (GFR) and renal plasma flow (RPF) by simultaneous administration of furosemide and, 1018 (Abst.)
Saphenous vein bypass graft, results of medical management of angina pectoris in candidates for, 794 (Abst.)

Scintillation scanning (SS) employing tracer amounts of ^{131}iodocholesterol, visualization of aldosterone-producing tumors (APT) by, 814 (Abst.)
Serum albumin and growth hormone relationships in kwashiorkor and nephrotic syndrome, 865
binding of catecholamines to human, 810 (Abst.)
calcium level and calcium absorption in man: effect of intravenously infused calcium, relationship between, 1002 (Abst.)
enzyme lowering and other effects of diethylstilbesterol (DIES) in Duchenne's muscular dystrophy (DMD), 797 (Abst.)
factor which inhibits cell-mediated tumor immunity in man, identification of, 854 (Abst.)
lipoproteins in hypo-β-lipoproteinemia, study of polypeptides of, 985 (Abst.)
and red cell membranes in abetalipoproteinemia: deficiency of lecithin: cholesterol acyltransferase, relationship between, 323
mechanisms of leukocyte production and release: appearance of leukocytosis-inducing factor following treatment with anti-lymphocyte, 363
from myeloproliferative disorders, effect of, on erythropoietin-sensitive stem cells, 849 (Abst.)
or plasma, rapid microassay of gentamycin, kanamycin, neomycin, streptomycin, and vancomycin in, 457
porphobilinogen and hepatic porphobilinogen deaminase in normal and porphyric individuals, 683
transcobalamin in myeloid leukemia, 275
vitamin B_{12} and B_{12} binding capacity levels resembling that in chronic myelogenous leukemia, nonleukemic elevation of, 289
Sex chromosome complement in polymorphonuclear leukocytes, new technique, identification of human, 88
Sheep, metabolic acidosis and parathyroid hormone secretion in, 819 (Abst.)
Sickle cell anemia patients, carbamyl phosphate mediated inhibition of sickling of erythrocytes in whole blood in vitro from, 843 (Abst.)
Sinoatrial node suppression and recovery, electrophysiologic stress tests in man:, 805 (Abst.)
Skin, soluble precursor of amyloid from normal human, 855 (Abst.)
Sodium depletion on experimental hypertension in rat, influence of acute, 369
ricinoleate, diarrhea, castor oil, their effect on electric slow waves of the colon, 828 (Abst.)
Sodium—Cont'd
fluoride, vitamin D, and calcium in osteoporosis, effect of combined therapy with, 994 (Abst.)
in intestinal calcium transport, role of, 1014 (Abst.)
reabsorption in normal and vena caval dogs during volume expansion, comparison of alteration in proximal tubular, 1020 (Abst.)
stimulated adenosine triphosphatase (ATPase) activity of kidney mitochondria, 1021 (Abst.)
Sphincter assessment, circumferential manometry: a new method of, 834 (Abst.)
Staphylococcus aureas endocarditis, 984 (Abst.)
Staphylococcus epidermidis, methicillin (MC) resistance in, 980 (Abst.)
Stem cell response to thrombocytopenia, 872
Steroid influence on hepatic gluconeogenesis and glycogen formation, sex, 997 (Abst.)
Sterol balance studies in patients on solid diets: comparison of two "nonabsorbable" markers, 811 (Abst.)
Stilbesterol on renal pressor system as modified by adrenalectomy and secondary aldosteronism, effects of, 30
Simulation modeling, tool for medical planning, 836 (Abst.)
Streptomycin, and vancomycin in serum or plasma, rapid microassay of gentamycin, kanamycin, neomycin, 457
Sulfobromophthalein sodium (BSP) for transport into bile; evidence for single excretory system, competition by unconjugated and conjugated, 230
Sulfones, a chromatographic-fluorometric procedure for determination of nanogram quantities of antileprotic, 464
Synovial fluids of arthritic patients, inorganic pyrophosphate concentrations in, 216

T

Tail-cuff method for determining systolic arterial pressure in unanesthetized normotensive and spontaneously hypertensive rats, validity of indirect, 957
method in awake normotensive and hypertensive rats, pressor effects of, 675
Technetium-labelled human albumin microspheres for studies of coronary circulation, use of, 807 (Abst.)
Testosterone binding in women with hirsutism, abnormalities of, 818 (Abst.)
derivatives in orchiectomized rats, erythropoietic activity and androgenic implications of 29, 399

Testosterone—Cont'd
induced 18-hydroxylase block: new form of steroid hypertension in man, 813 (Abst.)
Thrombocytopenia, stem cell response to, 872
Thromboembolism during pregnancy and postpartum state, 838 (Abst.)
Thrombosis, and acute myocardial infarction, blood hypercoagulability, 798 (Abst.)
plasmin generation in dogs with venous, 1002 (Abst.)
Thyroid carcinoma, diagnostic dependability of calcitonin assay in family studies for medullary, 817 (Abst.)
function, effects of prostaglandin antagonist, polyphloretin phosphate (PPP), on basal and stimulated, 823 (Abst.)
Thyrotropic-secreting hormone by anti-FSH sera prepared by several immunization regiments, binding of tracer FSH, LH, GH, and, 949
Thyroxine (T4) and tri-iodothyronine (T3) binding to serum proteins by heat, alterations in, 999 (Abst.)
Tissue culture, synthesis of cobalamin coenzymes by human cells in, 302
Transcobalamin I in leukemoid reaction, increased, 298
Tricuspid insufficiency, hemodynamic study of, 800 (Abst.)
Tri-iodothyronine (T3) binding to serum proteins by heat, alterations in thyroxine (T4) and, 999 (Abst.)
Tubules in malignant growths, 858 (Abst.)
serum factor which inhibits cell-mediated, 854 (Abst.)

U

Ulcerative colitis and carcinoma of colon; clinical application of new technique, tissue cytogenetic studies in chronic, 835 (Abst.)
Urea (or dexamethasone) and magnesium sulfate, therapy of delirium tremens with, 990 (Abst.)
synthesis to dietary protein, adaptation of, 830 (Abst.)
Uremia, bone collagen-mineral maturation in chronic, 1000 (Abst.)
effects of dialysis, pulmonary shunting and decreased arterial-mixed venous oxygen content difference in, 1016 (Abst.)
Urinary electrolyte, aldosterone, and cortisol in pregnant women, postural influences on circadian rhythms of, 996 (Abst.)
Urinary—Cont'd
tract pathogens, antigens common to human and bacterial cells, 725
Urine collection: its diagnostic value in experimental renovascular hypertension, estimation of separated filtration fraction with use of renal vein catherization without, 8
Urokinase, dissimilarity of human vascular plasminogen activator and human, 354

V

Vagotomy, bile acid output induced by endogenous cholecystokinin in health: effects of cholecystectomy on, 828 (Abst.)
Vancomycin in serum or plasma, rapid microassay of gentamycin, kanamycin, neomycin, streptomycin and, 457
Vascular tissue, alpha-L-fucosidase activity of human, 995 (Abst.)
Vasopressin escape, tubule sodium reabsorption in, 1018 (Abst.)
neurohypophyseal function in rat: studies with new radioimmunoassay for plasma, 815 (Abst.)
Ventilation-perfusion relationships in upright and supine subjects, dynamic, 1008 (Abst.)
Vitamin B_{12} in postgastrectomy and achlorhydric patients, impaired absorption of egg, 839 (Abst.)
D, and calcium in osteoporosis, effect of combined therapy with sodium fluoride, 994 (Abst.)
metabolites, studies on calciferol metabolism: comparison of species distribution and chromatographic separation of, 561

W

Water and furosemide-induced diuresis on acquisition and course of experimental pyelonephritis, effects of, 130

X

Xenon^{133} methods, pulmonary shunt determinations: comparison between oxygen inhalation (Berggren) and, 785

Z

Zinc deficiency on collagen metabolism, effect of, 853 (Abst.)
excretion in man, flow related characteristics of, 1019 (Abst.)

XUM
